

20KV Female Bulkhead to MHV Female 4 Hole Flange Cable RG213HV Coax

FMCA9786

Configuration

Connector 1: 20KV Female BulkheadConnector 2: MHV Female 4 Hole Flange

· Cable Type: RG213HV

Features

- · 69% Phase Velocity
- · polyurethane Jacket

Applications

· General Purpose

· Laboratory Use

Description

The 20KV female bulkhead to MHV female 4 hole flange cable using RG213HV coax, part number FMCA9786, from Fairview Microwave is in-stock and ships same day. This Fairview 20KV to MHV cable assembly has a female to female gender configuration with 50 ohm RG213HV coax. Our RF cable assembly with 20KV bulkhead and MHV 4 hole flange interface allows designers to create external connections on their product enclosures, and can be used in a variety of other rack mount and panel mount applications. Our 20kV high voltage RF cable assemblies are designed to handle higher voltages and minimize the risk of electric shock. Both the connectors used in this cable assemblies have recessed contact design to withstand unmated higher voltage. These cable assemblies are commonly used in applications where high voltage transmission and RF signal integrity are critical. These cable assemblies are constructed with high-quality insulation materials capable of withstanding higher voltages, ensuring safety and preventing electrical breakdown. Our cable assemblies are built with durable and flexible materials to withstand harsh environmental conditions and repetitive movements, ensuring reliable performance over extended periods.

Custom versions of most RF cable assemblies can be built and shipped same day. Custom cable assembly lengths can be obtained by specifying the desired length on the web site at time of order or by contacting a sales representative. Other RF cable assembly value added services including connector orientation or clocking, heat shrink booting and labeling are also available. RF testing can also be performed to document the electrical performance of your cable assembly.
