

FMWMT1006 DATA SHEET

WR-42 Magic Tee Waveguide Using UG-595/U Square Cover Flange and Operating from 18 GHz to 26.5 GHz

Fairview's FMWMT1006 is a magic, or hybrid tee that operates from 18 GHz to 26.5 GHz, K band. It is a 4 port device that is internally tuned to optimize matching, balance, and isolation. Magic tees have an H-plane (sum) port, an E-plane (difference) port, and two collinear ports. A signal applied to the H port will be equally divided between the two collinear ports. A signal applied to the E port will be divided between the two collinear ports but with a 180 degree phase difference. Similarly, when two in-phase signals of equal amplitude are applied to the collinear ports, these will be added together at the H-plane (sum) port and subtracted from one another at the E-plane (difference) port.

Electrical Specifications

Description	Min	Тур	Max	Units
Frequency Range	18		26.5	GHz
Insertion Loss			0.5	dB
Isolation, E-H $(\Delta-\Sigma)$ Ports 25		dB		
Isolation, Collinear Ports	15			dB

Mechanical Specifications

Size

Weight 0.172 lbs [78.02 g]

Waveguide Size WR-42
Flange Type Square Cover
Flange Designation UG-595/U
Body Material and Plating Aluminum, Gold
Body Plating Specification ASTMB488

Environmental Specifications

Compliance Certifications (see product page for current document)

Plotted and Other Data

Notes:

Features:

- 18 to 26.5 GHz Frequency Range
- E to H Port Isolation 25 dB Min
- Collinear Port Isolation 15 dB Min
- 0.5 dB Insertion loss
- K Band

Applications:

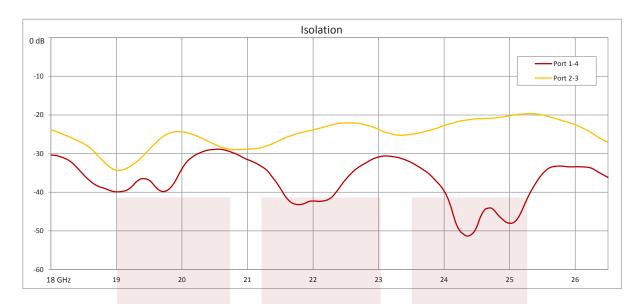

- Test and Measurement
- Military Communications
- Commercial Communications
- Wireless Communications
- SATCOM
