

7-16 DIN Male to 2.2-5 Female Adapter, Low PIM

7/16 DIN male to 2.2-5 female adapter part number FMAD1275 from Fairview Microwave is in-stock and ships same day. This Fairview 7/16 DIN to 2.2-5 adapter has a male to female gender configuration in a low PIM design. FMAD1275 7/16 DIN male to 2.2-5 female adapter operates to 8 GHz. The Fairview Microwave RF adapter provides excellent VSWR of 1.25:1 maximum and passive intermodulation of -160 dBc typical.

RF adapters can be used to enable connections between two connector types that would otherwise not mate. Certain RF adapter configurations can also be used to protect connectors on expensive equipment where the number of connect and disconnect cycles is high. An RF, microwave, or millimeter wave adapter is connected to the equipment and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Fairview Microwave also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
