

FMTR1110 DATA SHEET

RF Load 1 Watts to 34.5 GHz 3.5mm Male

RF termination (also called RF load or dummy load) FMTR1110 from Fairview Microwave operates from DC to 34.5 GHz and handles up to 1 Watt (CW). This 3.5mm termination (or load) is a 50 Ohm impedance and has a Male gender. FMTR1110 50 Ohm 3.5mm load termination offers 1.25:1 max VSWR.

RF terminations / loads are critical passive components in many RF, microwave and millimeter wave systems where signal reflection from unused ports can reduce the signal integrity can potentially damage the device. By terminating an unused port with a matched load (dummy load), the incident energy will be absorbed with minimal reflection. These radio frequency termination components are commonly used to terminate devices such as couplers, circulators, and switches. Loads / terminations are also widely used in measurement systems to ensure accurate results. Fairview Microwave offers a large selection of in-stock RF, microwave and millimeter wave terminations up to 65 GHz with great performance over the entire operating range and with power handling capabilities up to 800 Watts (CW).
