SBBA-180-43-01-SMA is a 1W wideband coaxial power amplifier operating in the 12 to 18 GHz frequency range. The amplifier offers 30 dBm min of P1db and high 43 dB typical small signal gain with the gain flatness of ±1.5dB max and an outstanding output IP3 performance of 39 dBm. This excellent technical performance is achieved through the use of hybrid MIC design and advanced GaAs PHEMT devices. The amplifier requires typically a +12V DC power supply. The connectorized SMA module is unconditionally stable and includes built-in voltage regulation, bias sequencing, and reverse bias protection for added reliability. The amplifier operates over the temperature range of -55°C and +85°C.
